PROFESSIONAL SUMMARY

Senior Product Manager with 6+ years of experience building and scaling data-driven and digital products across fintech, civic technology, education, and enterprise environments. Experienced in product strategy, 0→1 development, workflow design, data products, and cross-functional delivery, combining product, data, engineering, and operational expertise to translate complex problems into scalable products and measurable outcomes.

CORE EXPERTISE

Product: Product Strategy · Product Discovery · Product Roadmapping · 0→1 Product Development · Product Requirements · User-Centred Design · Product Analytics

Leadership: Cross-Functional Leadership · Stakeholder Management · Agile/Scrum · Product Operations · Process Improvement

Data & Technology: Data Products · AI & Automation · SQL · Data Platforms · Workflow Systems · Analytics

PROFESSIONAL EXPERIENCE

Elizabeth School of London (*Assessments Officer*)

8/2026 – Present

- Manage assessment data and operational workflows across **Level 4–6 programmes**, maintaining accurate records across modules, assessments, submissions, grades, plagiarism results, and student outcomes.
- Build and maintain **assessment tracking and Excel-based reporting systems**, consolidating data from Moodle and academic processes to improve visibility, data accuracy, and workflow efficiency.

Aliov (*Founder & Product Manager*)

11/2025 – 8/2026

- Conducted customer discovery by engaging **50+ legal firms and 75+ legal professionals**, leading structured interviews to identify pain points across client intake, case management, document tracking, and legal workflows; translated findings into product requirements and a prioritised roadmap.
- Defined and launched the MVP for a legal CRM, designing **4+ core workflows and 12+ product features** across client, matter, document, task, and case management to centralise fragmented legal operations.
- Designed product and data architecture using **Next.js and Supabase**, structuring interconnected records across clients, cases, documents, tasks, and users; led iterative development, testing, and launch from concept to working MVP.

City of Baltimore (*Data Product Manager*)

9/2024 – 11/2025

- Led a city-wide analytics initiative leveraging **41,000+** service records to identify systemic drivers of illegal dumping, designing interventions projected to reduce incidents by **25%**.
- Architected cross-agency workflow improvements for 311 operations, increasing service completion rates from **<50% to 75%** by redefining SLAs and operational processes.
- Built and scaled a centralized reporting platform used across **15+ agencies**, reducing reporting cycle time by 30% and increasing stakeholder engagement by **40%**.
- Directed a **\$60K** multi-stakeholder implementation across **3** operational hubs and **5** executive offices, delivering infrastructure, tooling, and systems on time and within budget.

Morgan State University (*Data Product Analyst*)

7/2023 – 9/2024

- Led data strategy and analysis for environmental and redlining initiatives impacting **7,600+** households across **153** municipalities, informing policy and funding decisions.
- Designed and automated end-to-end reporting pipelines, increasing analytical throughput by **90%** and significantly reducing manual effort.
- Managed and scaled operations for a **12-person** team supporting programmes serving **3,500+ students**, improving coordination and delivery efficiency.

VMware (*Product Manager*) **6/2022 – 8/2022**

- Owned validation and testing strategy for enterprise device management solutions (Workspace ONE UEM) across Linux-based systems and Amazon WorkSpaces environments.
- Identified product gaps and performance constraints, delivering recommendations that informed product roadmap and go-to-market positioning.

Oracle (*Product Manager*) **6/2021 – 8/2021**

- Designed and deployed **5 SQL-driven analytics dashboards** using APEX and Grafana, enabling real-time KPI tracking and improving operational visibility.
- Translated business requirements into scalable data solutions, aligning technical implementation with product needs.

Oasis Inc. (*Product Analyst*) **8/2019 – 6/2021**

- Led migration of **1,500+** user records into a centralized data system, improving data integrity, accessibility, and long-term scalability.
- Designed operational workflows and logistics operations supporting **50+ monthly users**, improving service reliability.

Morgan Stanley (*Technology/Product Analyst*) **6/2019 – 8/2019**

- Built data-driven monitoring systems using Java, AngularJS, and Kafka across multiple enterprise systems.
- Developed analytic dashboards connected to Teradata databases, enabling real-time reporting for internal stakeholders.

VENTURE & INVESTMENT EXPERIENCE

London Venture Studio (*Venture Builder*) **6/2026 – Present**

- Spearheading growth strategy for a venture studio by mapping and analyzing **34 London universities**, developing data-driven acquisition initiatives to recruit student founders and establish a foundation for international expansion.

Oregon Sports Angels (*Product Analyst*) **6/2023 – 1/2024**

- Created portfolio updates for **31 startups**, improving investor visibility into company progress.

SupplyChangeCapital (*Product Analyst*) **9/2022 – 12/2022**

- Led data-driven due diligence on **50+ startups** using Airtable, writing investment memos for impact investments.

MotivateVC (*Product Analyst*) **6/2022 – 9/2022**

- Used Airtable, Excel, and Streak to support due diligence and relationship management across **100+ startups**.

HBCUvc (*Product Analyst*) **8/2021 – 7/2023**

- Presented **20+ memos and teasers**, evaluating pipeline companies and delivering investment recommendations.

SELECTED FELLOWSHIPS

Harvard AWS NextGen Fellow (*Selected 25 teams from 500 applications*) **2023**

NSF I-Corps Fellow (*Customer discovery & product validation fellowship for founders*) **2023**

Stanford University Innovation Fellow (*Repped institution in a global I&E fellowship*) **2017**

EDUCATION

Morgan State University | MBA, Management **2025**

Johns Hopkins University | MS, Engineering & Product Management **2023**

Morgan State University | BS, Electrical Engineering **2020**

Certification: Aha Product Management · PSM I · Google Project Management · Pendo Product-Led
